

PJSC ArcelorMittal Kryviy Rih

ISO 50001:2018

ENERGY POLICY

PJSC ArcelorMittal Kryviy Rih is committed to efficient use of energy and energy saving in order to strengthen its position of a leader and assume social obligations for the environmental condition in favor of all the concerned parties. This Policy points out the guidelines to all the employees in order to compile successful and rational programs on energy management.

These commitments must be taken into consideration and implemented in all our further activities.

During organization and performance of work in the area of energy management, PJSC ArcelorMittal Kryviy Rih, primarily, follows international standards and national legislative and statutory and regulatory requirements, as also standards in the area of energy resources use, energy saving and improvement of energy efficiency, as well as other requirements that the Plant commits to fulfill.

The goal of PJSC ArcelorMittal Kryviy Rih is to produce products with rational use of energy resources and minimal environment impact.

At all the stages of production activity, PJSC ArcelorMittal Kryviy Rih applies the following principles:

- ✓ leadership, regardless of work status and profession;
- ✓ improvement of energy efficiency by implementing actions on energy resources saving;
- ✓ rational use of fuel and energy resources;
- ✓ purchase of reliable energy efficient equipment with the improved energy characteristics;
- ✓ uninterruptable and reliable energy supply of PJSC ArcelorMittal Kryviy Rih by using energy efficient equipment and technologies;
- ✓ reduction of negative environment impact by reducing consumption of fuel and energy resources;
- ✓ improvement of knowledge level in the area of energy saving and energy management of PJSC ArcelorMittal Kryviy Rih personnel that influences fuel and energy resources consumption, as well as raising awareness about Energy Policy and its goals at all the levels of organization, raise of interest in energy resources rational use and saving;
- ✓ transparency of significant information on energy saving activity.

In order to meet these principles, PJSC ArcelorMittal Kryviy Rih incurs the following commitments:

- ✓ implementation and continuous improvement of energy management system in compliance with the requirements of International standard ISO 50001:2018;
- ✓ planning of the Plant activity, taking into account development and fulfilment of the actions on energy saving and energy efficiency improvement;
- ✓ upgrading of the equipment (decommissioning of obsolete equipment with its replacement by the equipment of the enhanced reliability with the improved energy characteristics), engineering, taking into account improvement of energy performance of the Plant;
- ✓ improvement of energy saving activity of PJSC ArcelorMittal Kryviy Rih through timely development and updating of energy saving actions, clear differentiation of rights, obligations and responsibilities of employees for their realization;

- ✓ raising responsibility of the personnel for rational and efficient use of energy resources;
- ✓ organization of energy inspections, followed by subsequent analysis and systematic use of the indicated information;
- ✓ development and implementation of corrective actions aimed at the elimination of root causes of incompliances of energy saving activity to the requirements of standards and rules in the area of energy saving and improvement of energy efficiency;
- ✓ identification of energy risks, development and fulfilment of plans with respect to their prevention, elimination and mitigation of their impact on energy efficiency of the company;
- ✓ setting of ambitious goals and integration of energy efficiency issues in the decision-making system at all management levels;
- ✓ compliance with applied statutory and regulatory requirements, applicable to the activity of PJSC "ArcelorMittal Kryvyi Rih", as well as the requirements which PJSC "ArcelorMittal Kryvyi Rih" agreed with and which committed to fulfill in the area of energy resources use, energy saving and energy efficiency improvement;
- ✓ providing necessary resources and information to implement energy policy and achieve energy goals and objectives;
- ✓ continuous work in the area of awareness raising of personnel and other individuals, working at PJSC ArcelorMittal Kryvyi Rih, in the area of energy efficiency and energy saving.

Compliance to the given principles and commitments is a keystone of constant improvement of energy efficiency level of PJSC ArcelorMittal Kryvyi Rih.

Obligations spread to all structural subdivisions of PJSC ArcelorMittal Kryvyi Rih.

This Policy will be realized through implementation, continuous development and improvement of energy management system of the Plant.
